Scheduled Tribes	ST
Scheduled Castes	SC
Other Backward Classes	OBC

1. Brief Introduction To The Survey:-

The reservation system in India, works as an access to reserving seats for the people hailing from 'backward castes' and other 'minority' sections, in various government sector.

The history of reservation system in India dates long back before Independence, Poona Pact 1932.

The constitution of India provides reservation to people from Scheduled Castes, Scheduled Tribes, and Other Backward Classes.

In 1982, government specified that 15% and 7.5% reservation in government sectors and public funded educational institutions to SC and ST candidates, respectively. The OBC reservations of 27% was implemented in 1990s after Mandal Commission recommendations were accepted.

According to government's policy reservation cannot exceed 50% limit, as it will defy its principle concept of equality; on the grounds of which it was proposed at the first place.

This survey however deals with students take on the reservation system with a qualitative approach towards the subject rather than a quantitative one. With the help of various questions in the detailed and aptly framed questionnaire, it is an attempt to know what the youth of this nation thinks about this system; as it is one discipline on which it has a direct effect.

2. Project Location:-

This survey was conducted in 20 states with our volunteers getting the forms filled by 1800 students across different universities. The states covered were:

- Andhra Pradesh
- Assam
- Bihar
- Chhattisgarh
- Delhi
- Gujarat
- Haryana
- Jharkhand
- Karnataka
- Kerala
- Madhya Pradesh
- Maharashtra
- Orissa
- Punjab
- Rajasthan
- Tamil Nadu
- Telangana
- Uttar Pradesh
- Uttarakhand
- West Bengal

3. Objective of the study:-

Reservation is an integral part of our society and the policy has direct or indirect effect on each one of our life. The main objective of the survey was to gain first hand opinion of the university students on the reservation policy and population growth in various sectors such as government jobs, educational institutions, parliament and also the private sector upto some limit.

The project covered different states across the country to incorporate varied views of the students on the topic of reservation. The area most largely affected by reservation policy is the education sector. So this survey tried to gain an insight into what do people think about it.

In the survey, opinion was taken from students of 20 States belonging to various castes, tribe, religion, gender, educational institutes, academic disciplines and economic background. The sample helped us understand various effects of the reservation policy on students belonging to different categories in these states.

The study covered basic information on the effect of reservation policy in government jobs and educational institutions and also some general questions related to the respondent.

4. Interview Language:-

The questionnaire was in English but in many states, the interviewer had explain question in the local language of the state. In Chattisgarh, the volunteers had to explain the questions in Hindi as many students couldn't understand English. In states like West Bengal, Assam and Orissa the volunteers had to explain the questionnaire to the students in their local languages. The volunteers selected knew both English and local language of the concerned state.

There were some who were ignorant of the issue so the questions had to be explained to them and then their responses were noted accordingly. For example, the question as Do all your family members generally tend to vote for a single identical political party?, Which political party do you think is the strongest supporter of reservation for the following community? or which in the subparts deals with each caste. Questions

as such had to be explained to the students and also the volunteers showed them the list of various different political parties for better understanding.

5. Methodology:-

The Qualitative Approach Methodology was used to conduct this survey. Different research tools were applied in this survey for the better understanding of University students on reservation and population related issues in India. The methodology involves thorough research of the government policies, extensive reading of the Articles of the Indian Constitution related to reservation and questionnaire-based survey at the ground level.

Step by step research methodology:

Step 1. Background Research

A preliminary research was conducted on the survey topic through secondary data. The government policies, acts of the constitution, people's thought on the reservation in general and also about all the controversies regarding this subject. It was done as a measure to have a brief view of the topic and things related to it.

Step 2. Preparation of the questionnaire

A long and detailed questionnaire was prepared for the survey. The questionnaire was divided into two parts along with the basic information of the interviewee.

Part 1:-

The first part of the questionnaire dealt with the basic questions on reservation and population related issues. The first part has 51 questions with subheads as, what are the views on the current reservation structure in the government as well as private sector, whether the reservation should continue or not, views on the major political parties (BJP and Congress) approach to reservation, the contribution of reservation policy in the upliftment of those communities. The end questions of this part also dealt with the areas regarding the person's personal approach towards reservation and has it has caused any direct individual effect on their life.

The answers to these questions ranged from on the scale from -5 to 5 or from neutral to highly satisfied to highly disappointed for example. Most of the questions did not had the answer in 'Yes' or 'No' which helped in getting a detailed idea of the person's understanding of the subject.

The questions from 45-51 dealt with the population issues and its effect upon the people of India. From gaining views about whether the current population ageing will affect the fiscal spending of elderly in India, to the students take upon whether or not they would like to have a kid in future and other such questions which help in knowing what the youth of the country thinks about the issue of population.

Part 2:-

The second part of the questionnaire dealt with basic biographical questions about the interviewee. Person's identity, family background, the academic discipline, living conditions (in university and in their hometown), and some individual views on certain topics.

Step 3. Sampling

Since students in different states of India belong to different castes and tribes, also different states have different policies regarding reservation, so stratified sampling method was used during the survey. The students from various caste and tribe were selected in a manner that an equilibrium could be maintained in the sampling and all the tribes and castes could be duly represented.

The same kind of equilibrium was tried to be maintained in dividing the male to female ratio or the students opting in different streams of study; be it science, arts or commerce. Equal representation of different varieties of students was a must for proper conduct of the survey.

The survey required the responses of around 1,800 students so different states were selected and in each state, the equilibrium in between the variety of students was tried to be maintained.

Step 4. Preparation and Conduction of Survey

The survey was conducted from 6th April to 15th May. Around 20 volunteers were appointed to conduct the survey. The number of volunteers differed in each state, but at least 1 to 2 volunteers were appointed to each state. Some volunteers covered more than one state.

A proper explanation session was set up for every volunteer. The project was explained to them and they were given the instructions either by on phone or through skype call, and also by meeting up when and wherever possible. Setting up a meeting was considerably easy with volunteers in Delhi, Haryana, Uttar Pradesh and other nearby states. And wherever a personal meeting was not possible, a Skype call was duly arranged for the volunteers to properly understand their work.

There were various formalities that had to be completed before conducting the survey. Each volunteers was given an authorization letter by the company along with the questionnaire, which stated the purpose of the survey and authorized him to conduct the survey. In some states, a letter was sent to the dean of the university, stating the purpose of the survey, the time and number of students required and also a copy of the questionnaire seeking his permission to conduct the survey in his University. The signing of the letter took a lot of time, which caused a delay in the survey. Usually, 5-6 surveys were conducted in a day, in each state.

In states such as Chattisgarh, Orissa, West Bengal and some states of North East the volunteers had to use the local language. But most of the survey was conducted in English. Language translator or interpreter was not required but the volunteers explained the questionnaire to the people in their local language when and wherever required.

The survey was largely conducted in the college or university campuses. The volunteers went to the campuses and interacted with the students there to take part in the survey. Each interview took about half an hour to be completed.

The parameters had been set for the kind of respondents required for the survey. The selection varied with the state and the universities that were being dealt with since the population and the variety of students is different in each state.

The first step towards the selection of students for the survey was word of mouth strategy being used by the volunteers. They circulated the message among their friends in that particular state or university. Later the volunteers went from university to university talking to the students, telling them about the survey and the scope of the study asking them to fill the survey.

The other technique that was used was that instead of one particular university the survey was conducted in multiple universities in every state. The reason being the length of questionnaire, lack of volunteers, availability of students of different tribes being some of the major concerns.

This approach also helped us in gaining a variety of responses of people from every background.

Some of the states had a huge turnout while there were somewhere it got quite difficult to get even a minimum number of people to conduct the survey. In states like as Delhi, Uttar Pradesh, Haryana, West Bengal and Jharkhand the turnout was great.

Delhi and Uttar Pradesh had the highest turnout of more than 200 respondents, one of the major reasons being that Delhi being the capital is the hub of almost all the major educational institutions in India. Students from across the country belonging to different castes, tribes, religions and family backgrounds come to Delhi for their higher education. Due to which it became easy to fulfil the parameters and conduct the survey. The number of volunteers in Delhi were also high when compared to other places.

Same being the reason for West Bengal, the turnout was great due to the abundance of students in the state and also that they were aware of the subject which helped the volunteers to conduct the survey easily.

Uttar Pradesh being the largest state of India is enormously populated. Finding students there was not a difficult task, as in Uttar Pradesh also there is a mixture of the people of different castes and tribes who make an ample share of the population of the state.

Jharkhand being a majorly tribal state, finding people from different castes and tribe was not a problem, which was one of the major reasons of the huge turnout in there.

Whereas in states such as Telangana, Kerala, Karnataka and Gujarat the turnout was very low. The reason for this is that all these states do not have tribal population in general and also most of the volunteers from these states backed out, which was also a reason of the extreme low turnout.

In most of the states the turnout was more or less average. The reason of so many variations in the turnout was mainly that the availability of students from different tribes was not same in every state.

Step 5: Challenges

There were some challenges in keeping up with the parameters set for the survey. The major problem that came along the way was that the time when the survey took place most of the students either had their examinations going on or had gone back home. The other thing that can be listed is that the population of different tribes, castes, sex and streams of students differ in every state. Some of them had a balanced ratio but in most of them there were either a lot of male students in comparison to female or in some states, the tribal and backward caste students were very less. All these things created the hindrance in maintaining the equilibrium. But nevertheless, the volunteers tried their best to include students from all different backgrounds.

Data Breakup

Table No 22:

SEX		CASTE				STREAM			YEAR	
M	F	GEN	ST	SC	OBC	Science	Arts	Com	1st & 2nd	3 rd ,4 th and Master
900	900	750	150	300	600	594	594	594	900	900

According to the ideal parameters an equilibrium had to be maintained in the students of different castes, creed and gender. The number of male and female respondents had to be equal and also the number of students of different castes was prescribed. The data collected after the survey was not very compliant with the given parameters but the volunteers tried their best to keep up with the given parameters. The number of male respondents was considerably high as in many states the number of female students was very less. For example, in Rajasthan, the number of female students was almost negligible. Another issue that came up was that the number of students from different tribes could not be kept up with because in many states the population of students belonging to different tribes was very less. The OBC category students were almost complied with.

Arts was the stream of study most opted for and most of the students belonged to graduation. The reason being the length of questionnaire due to which many students found it quite boring and it took a lot of time to complete the questions due to which the students of masters and above that were not quite interested in filling the form.

Instructions for Data Collectors

1. Classify questionnaires for different Social Groups after filling Exact numbers.
2. If respondents do not have any answer or do not know, mark the answer as NA or 99.

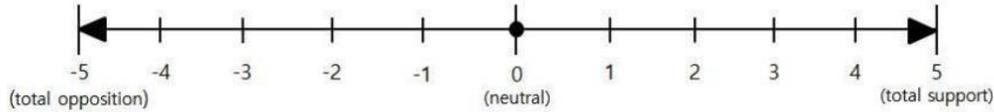

Main Questions

Q1. Do you support reservation **IN GENERAL?**

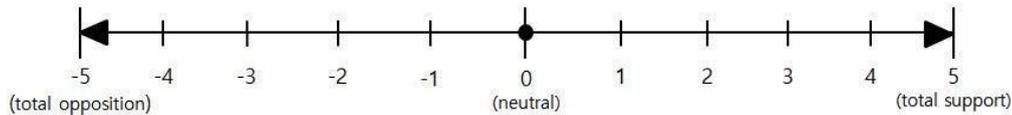

1 Yes

2 No

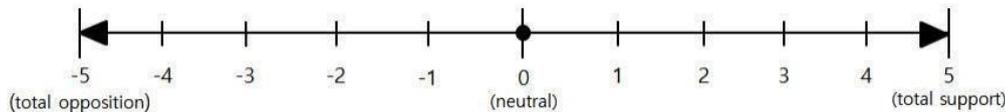

Q2. How much do you support or oppose reservation for **SCs** regardless of reservation fields?

Q3. How much do you support or oppose reservation for **OBCs** regardless of reservation fields?

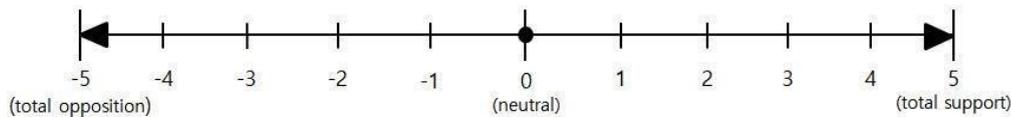

Q4. How much do you support or oppose reservation for **STs** regardless of reservation fields?

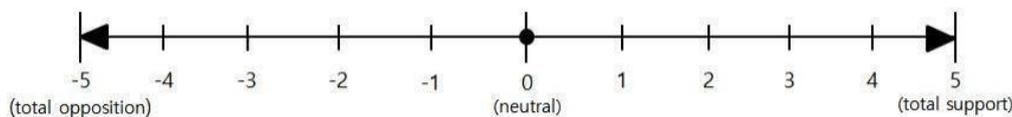

Q5. how much do you support or oppose reservation for **SCs** in the following specific fields?

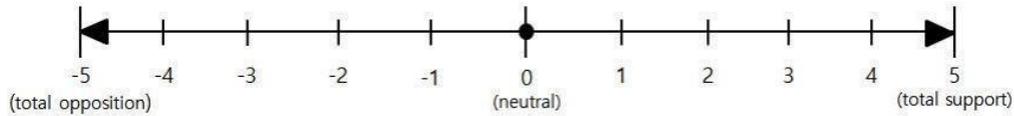

▷ **In government jobs?**

▷ **In university admission?**

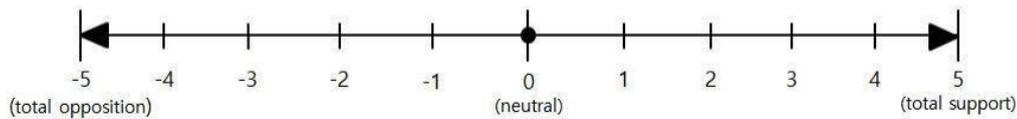

▷In Lok Sabha?

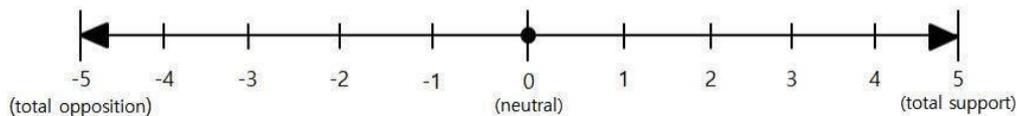

Q6. How much do you support or oppose reservation for **OBCs** in the following fields?

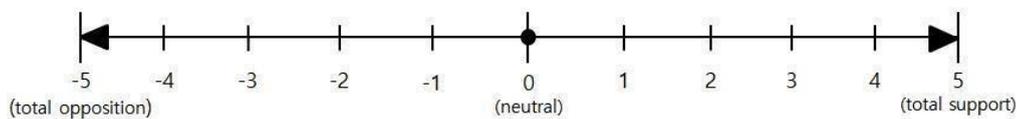

▷In government jobs?

▷In university admission?

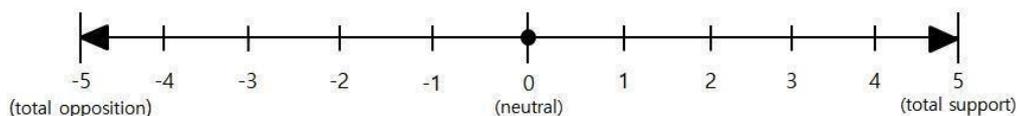

▷In local government councils such as panchayat?

Q7. Do you think that the current reservation quota for **OBCs** is less than sufficient or sufficient or more than sufficient?

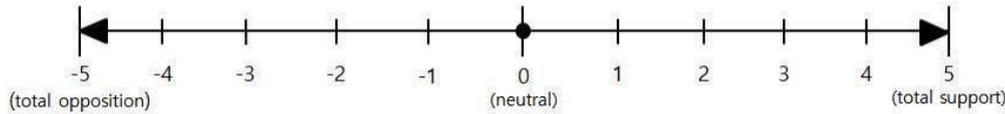

- ① less than sufficient
- ② sufficient
- ③ more than sufficient

Q8. How much do you support or oppose the idea of expanding the current reservation policy **IN GENERAL** to the private sector?

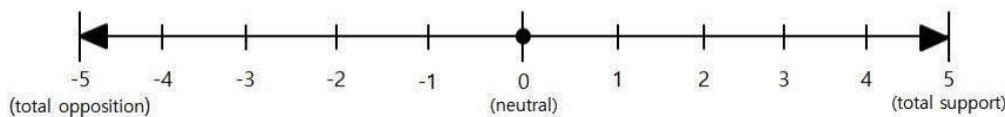

Q9. How much do you support or oppose the idea of expanding reservation to the private sector **for the following specific communities?**

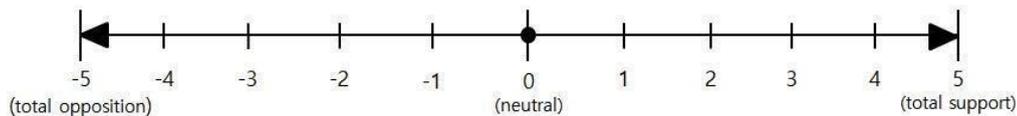

▷ **for SC?**

▷ **for OBC?**

▷ **for ST?**

Q10. How longer do you think reservation **for SCs** needs to be sustained in the following fields?

▷ **In university admissions?**

- 1 no further extension
- 2 for less than 10 years
- 3 for less than 20 years
- 4 for less than 30 years
- 5 as long as possible

▷ **In government jobs?**

- 1 no further extension
- 2 for less than 10 years
- 3 for less than 20 years
- 4 for less than 30 years
- 5 as long as possible

▷In Lok Sabha?

- 1 no further extension
- 2 for less than 10 years
- 3 for less than 20 years
- 4 for less than 30 years
- 5 as long as possible

Q11. How longer do you think reservation **for OBCs** needs to be sustained in the following field?

▷In university admissions?

- 1 no further extension
- 2 for less than 10 years
- 3 for less than 20 years
- 4 for less than 30 years
- 5 as long as possible

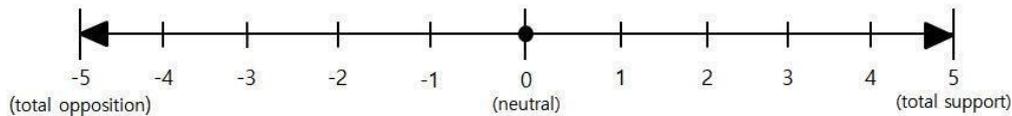

▷In government jobs?

- 1 no further extension
- 2 for less than 10 years
- 3 for less than 20 years
- 4 for less than 30 years
- 5 as long as possible

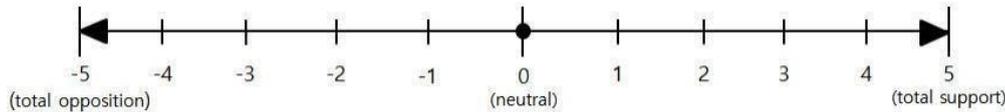

▷In local government councils?

- 1 no further extension
- 2 for less than 10 years
- 3 for less than 20 years
- 4 for less than 30 years
- 5 as long as possible

Q12. How much do you support or oppose the idea that reservation **in government jobs** should be extended to **women**?

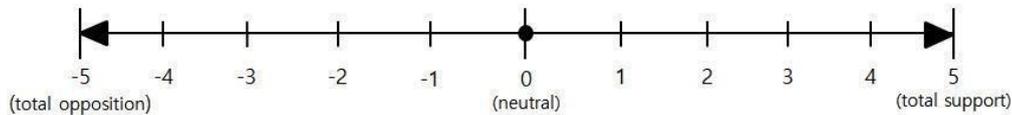

Q13. How much do you support or oppose the idea that **Lok Sabha seats** should be reserved for **women** too?

Q14. Should the Lok Sabha seats be reserved for **women**, what would be the best reservation quota for women in Lok Sabha?

- 1 Up to 10% of the Lok Sabha seats
- 2 11% - 20% of the Lok Sabha seats
- 3 21% - 30% of the Lok Sabha seats
- 4 More than 30% of the Lok Sabha seats

Q15. How much do you support or oppose the idea that the current reservation for **women in local self-government bodies** should continue?

Q16. Which political party do you think is **the strongest supporter** of reservation for the following community? (Instruction : Interviewer may show the list of political parties)

▷ **in general?**: _____

▷ **for SC?** : _____

▷ **for ST ?**: _____

▷ **for OBC?** : _____

Q17. Which political party do you think is **the strongest opponent** of reservation for the following community? (Instruction : Interviewer may show the list of political parties)

▷ **in general ?**: _____

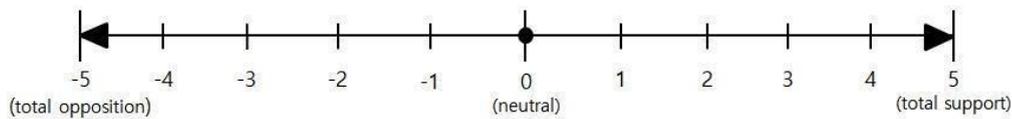

▷ **for SC?** : _____

▷ **for ST?** : _____

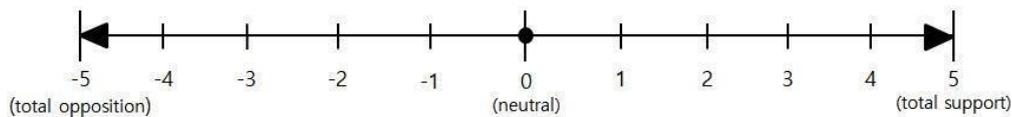

▷ **for OBC?** : _____

Q18. How much do you think that **the BJP** supports or opposes reservation for the following community?

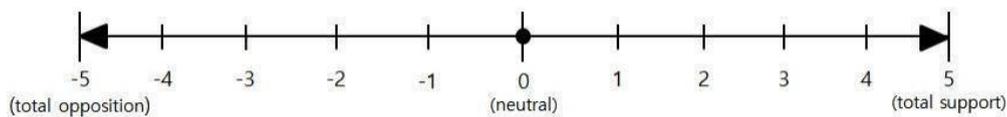

▷ **in general?**

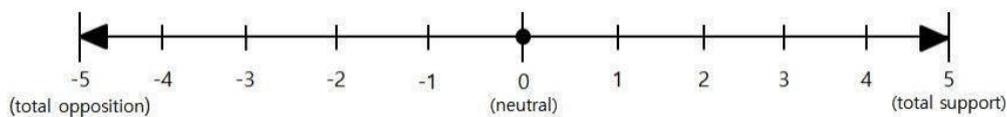

▷ **SC?**

▷ **OBC?**

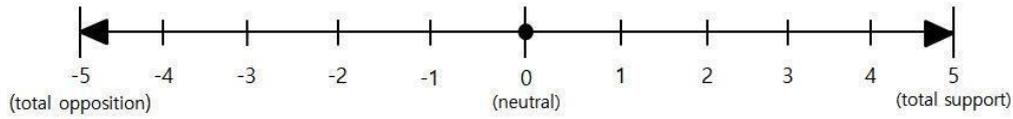

▷ **ST?**

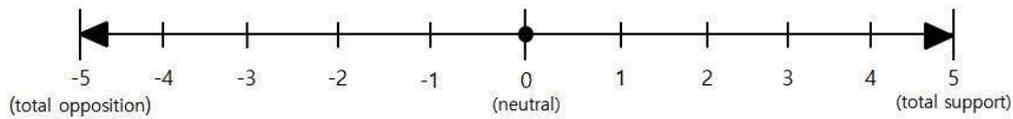

Q19. How much do you think that **Congress Party** supports or opposes reservation for the following community?

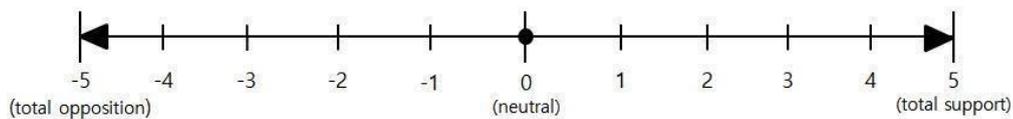

▷ **in general?**

▷ SC?

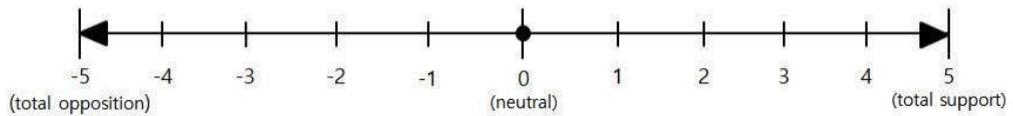

▷ OBC?

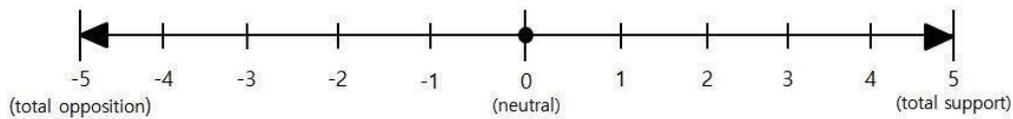

▷ ST?

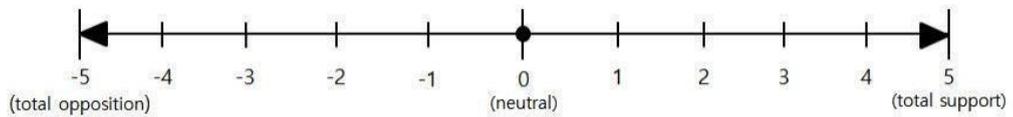

▷ SC?

▷ OBC?

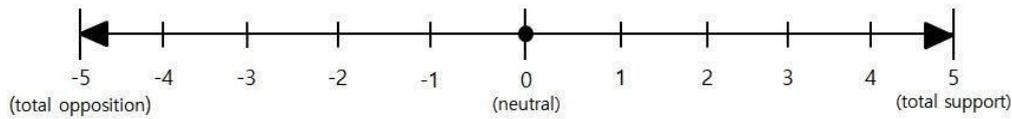

▷ ST?

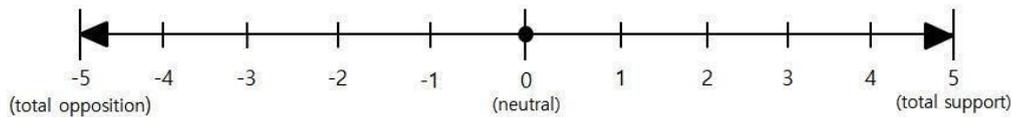

Q19. How much do you think that Congress Party supports or opposes reservation for the following community?

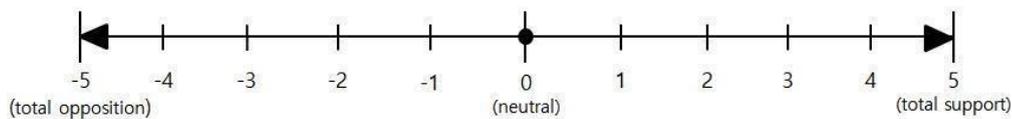

▷ in general?

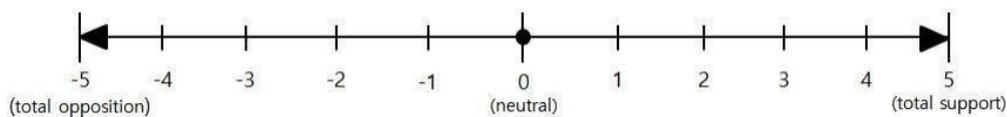

▷SC?

▷OBC?

▷ST?

Q20. Do you any political party you like the most?

- 1 Yes -----(continue to answer Q20-1.)
- 2 No -----(skip to Q21.)

Q20-1 Only if yes to Q20, what is its name? : _____

(Instruction : Interviewer may show the list of political parties)

Q21. Do all your family members generally tend to vote for a single identical political party?

- 1 Yes -----(continue to answer Q21-1.)
- 2 No -----(skip to Q22.)

Q21-1. Only if yes to Q21, what is its name? : _____

Q22. Which political party did you happen to vote for in the last Lok Sabha election?

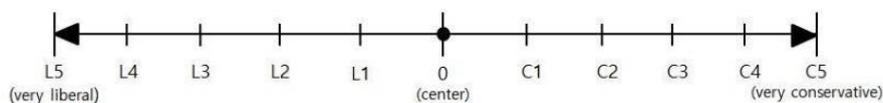

: _____

Q23. Which statement is closest to your position concerning the backwardness of

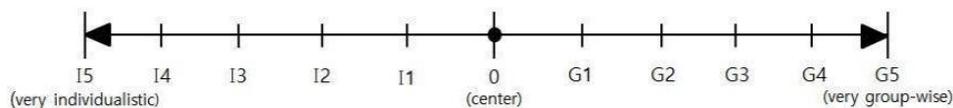

people?

- 1 I am willing to spend my own money to alleviate their backwardness.
- 2 Social/religious groups or non-government organizations(NGO) had better take care of them.
- 3 Only the state or government is responsible for the alleviation of their backwardness.
- 4 Backward people themselves are responsible for the alleviation of their backwardness.

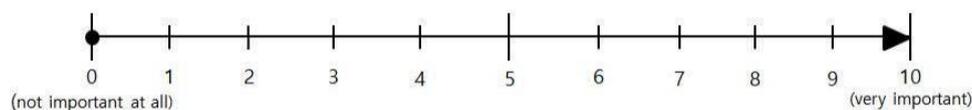

Q24. How liberal or conservative do you think you are?
